Domed Caitness flagstone coping stones

The information contained herein is to the best of our knowledge true and accurate and is given in good faith but without warranty. As part of our continual improvement process, Norse Stone Ltd reserve the right to change the properties listed on this data sheet without any prior notice.

Whilst every effort has been made to ensure that your Caitness flagstone coping is of the highest quality, it will look better and last longer if a few simple maintenance procedures are adopted.

Usage

Caitness flagstone coping stones are intended to be used for external projects as specified by the project designer or builder.

Routine Maintenance

Visual inspections to check for defects, loose material, cracks, movement or vegetation should be performed at least annually.

Any vegetation and plants growing on or between coping stones should be carefully removed to avoid long term damage to joints.

Due to being made from a durable natural stone, our coping stone doesn't usually require any cleaning. In the event cleaning is required, use warm water with a mild detergent or dish soap along with a soft bristled brush. Never use harsh chemicals or high-pressure sprayers or hoses.
